

Engineering capabilities

Boost your engineering capacity by seamlessly collaborating with an extended workforce. Thousands of engineering professionals across various experience levels, ready to help you get work done.

Used by

Areas of expertise

Popular examples

Mechanical Engineering	Industrial Engineering	Electrical Engineering	Civil Engineering
Systems & Components Design	Production Process Optimisation	Circuits & Systems Design	Infrastructure Projects
Stress & Strain Analysis	Manufacturing Layout Design	Component Specifications	Building Regulation Compliance
Prototype Development	Production Schedules	Safety Feature Implementation	Environmental Impact Analysis
Product Performance Optimisation	Value Stream Mapping		
Technical Drawings	Supply Chain Efficiency		
Feasibility Studies	Lean Manufacturing		
Material Evaluations			
Safety Compliance

Case studies

Don't just take our word for it

 <p>Blackbear supported us in finding a new solution for automating our packaging process. The Solvers were organised and responsive to our feedback and questions — the solution-oriented approach and quick turnarounds were highly appreciated.</p> <p>Michael Feldhaus Director Technology Pharmaceutical Systems</p>	 <p>We needed to conduct research into suitable partners for the manufacturing and factory testing of Power Converters in Portugal. Through blackbear, we were able to quickly and effectively narrow down the field and eventually made a well-informed decision.</p> <p>Yanto Schraa Sales Director</p>	 <p>With the help of blackbear, we were able to gain vital information about how our employees engage with electrical tools. The Solvers provided relevant input and the final result allows us to make important steps forward.</p> <p>Confidential user Work Planner</p>

Types of work

Get work done on your own terms

 <p>Short Assignments In case you need an extra pair of hands for a short assignment like research, data validation or strategy.</p>	 <p>Temporary Roles For when you need additional capacity or a specific skill set for a set duration or a few hours per month.</p>	 <p>Projects Don't let complexity intimidate you! We find the skills you need and help you execute large projects, start to finish.</p>
